-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

1)  Responsive to communication(s) filed on 08 December 2006.

2a)  This action is **FINAL**.                            2b)  This action is non-final.

## DETAILED ACTION

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 7, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Maurer USPN 6200939.

As to claims 1 and 7 Maurer teaches a lubricating deodorant for ostomy pouches comprising an aqueous solution (col. 5, line 32) containing both a water-soluble lubricating agent (col. 4, lines 59-65) capable of wetting and clinging to interior wall surfaces of polymeric film materials of an ostomy pouch and a compatible water-soluble complexing agent capable of complexing and neutralizing odor-causing molecules in fecal matter (col. 5, lines 7-30).

As to claim 8, Maurer teaches the solution contains a pH adjuster or buffer (col. 5, lines 34-39).

As to claim 9, Maurer teaches the claimed percentages of lubricating agent and complexing agent (col. 5, lines 47-64).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maurer USPN 6200939. Maurer discloses the present invention substantially as claimed. However, Maurer does not disclose the complexing agent is a surfactant, but discloses a surfactant in addition to the complexing agent. It would have been obvious to one having ordinary skill in the art to incorporate the complexing agent and surfactant into one substance since forming into one substance what has previously been formed as two substance involves only routine skill in the art.

6. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maurer USPN 6200939 in view of Ahmad et al. USPN 5885591. Maurer discloses the present invention substantially as claimed. However, Maurer does not discloses a polyhydric alcohol lubricating agent instead of a cellulose lubricating agent. Ahmad

discloses both materials are comprise lubricating compositions (col. 2, lines 1-31). Therefore, because these two materials were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute polyhydric alcohol for a cellulose lubricant.

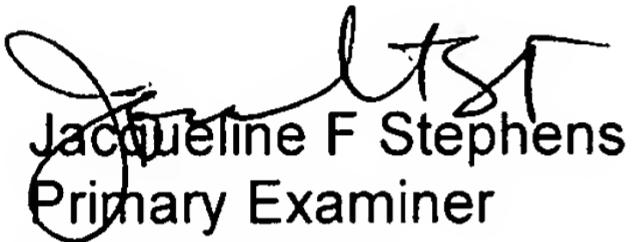

***Allowable Subject Matter***

7. Claims 10-14 are allowed. The primary reason for allowance is the prior art does not teach or provide motivation for treating the interior of the ostomy pouch with the claimed lubricating deodorant composition,
